DETAILED ACTION

Claim Objections

Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation "a garment", and the claim also recites "in particular for the torso or upper body part, such... or the

like” which is the narrower statement of the range/limitation. Note similar indefinite language set forth in claim 14.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 9, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Osborne (US 5605060).

The US-A-5 605 060 document discloses a garment consisting of seamlessly circular-knit cotton or circular-knit polyamide having a fraction of elastane, the garment comprising zones of differing elasticity, compression zones of higher elasticity being knitted into the garment to produce a stronger supporting effect.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3765

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4-8, 10-13 and 16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborne (US 5605060) in view of Dicker (5823851).

Osborne (US 5605060) teaches the invention substantially as claimed as indicated above in the rejection to claim 1. However, Osborne (US 5605060) does not teach two lamellar supporting compression zones across the back. Dicker teaches two lamellar compression zones across the back as shown in figure 1. It would have been obvious at the time the invention was made to provide the compression zones across the back in order to give greater support to the region of the wearer's back.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. ***.
